**RE: Reference for Computer Soft - Piotr Mroczek, Wroclaw, Poland**

To Whom It Might Concern

Computer Soft Company developed a bilingual i.e. Polish and English, fully integrated and responsive e-shop for our company in Oct - Dec 2015. The project had required building a complex bespoke e-shop for our new service and it comprised with: creating the whole layout and graphics, designing logo, CMS, synchronizing the website with PrestaShop engine and integrating with Api. The project took around 2 months to complete.

I was very impressed by the skills and knowledge of Mr Mroczek when he created such a great value for money e-shop in such a short period of time. The entire process proceeded without any major complications and it was completed even before the deadline.

During the whole process Mr Mroczek had shown a real passion and commitment to the job he was doing. The customer service he offered was very friendly and professional, his individual approach and the 'service after sales' he provided were also on a very high level.
